DevSecOps

150+
Testers

Application core skills

Our 1,200 associates are focused on specific skill competencies

Practices

Testing	Governance	Business Analysis
DevOps	Engineering	Mobile
User Experience	Architecture	Artificial Intelligence

Engineering Sub-practices

COBOL	FORTRAN	AB Suite
.NET	Java	Microservices
C & C++	Database	Pega

Example Project Organization

PROJECT 1

Engineering FORTRAN	Engineering Java	User Experience	Mobile

PROJECT 2

Engineering AB Suite	Engineering .NET	Testing	Business Analysis

PROJECT 3

Engineering COBOL	Engineering Pega	Testing	Business Analysis

Services we offer

Unisys and Custom Development

Application Modernisation

Application Managed Services

Application Staff Augmentation

Why clients choose us

Trusted client relationships

ClearPath® and mainframe skills are in our DNA

Modern and proprietary skills, such as AB Suite, JAVA, .NET, microservices and cloud technologies

Time tested and at scale industry solutions
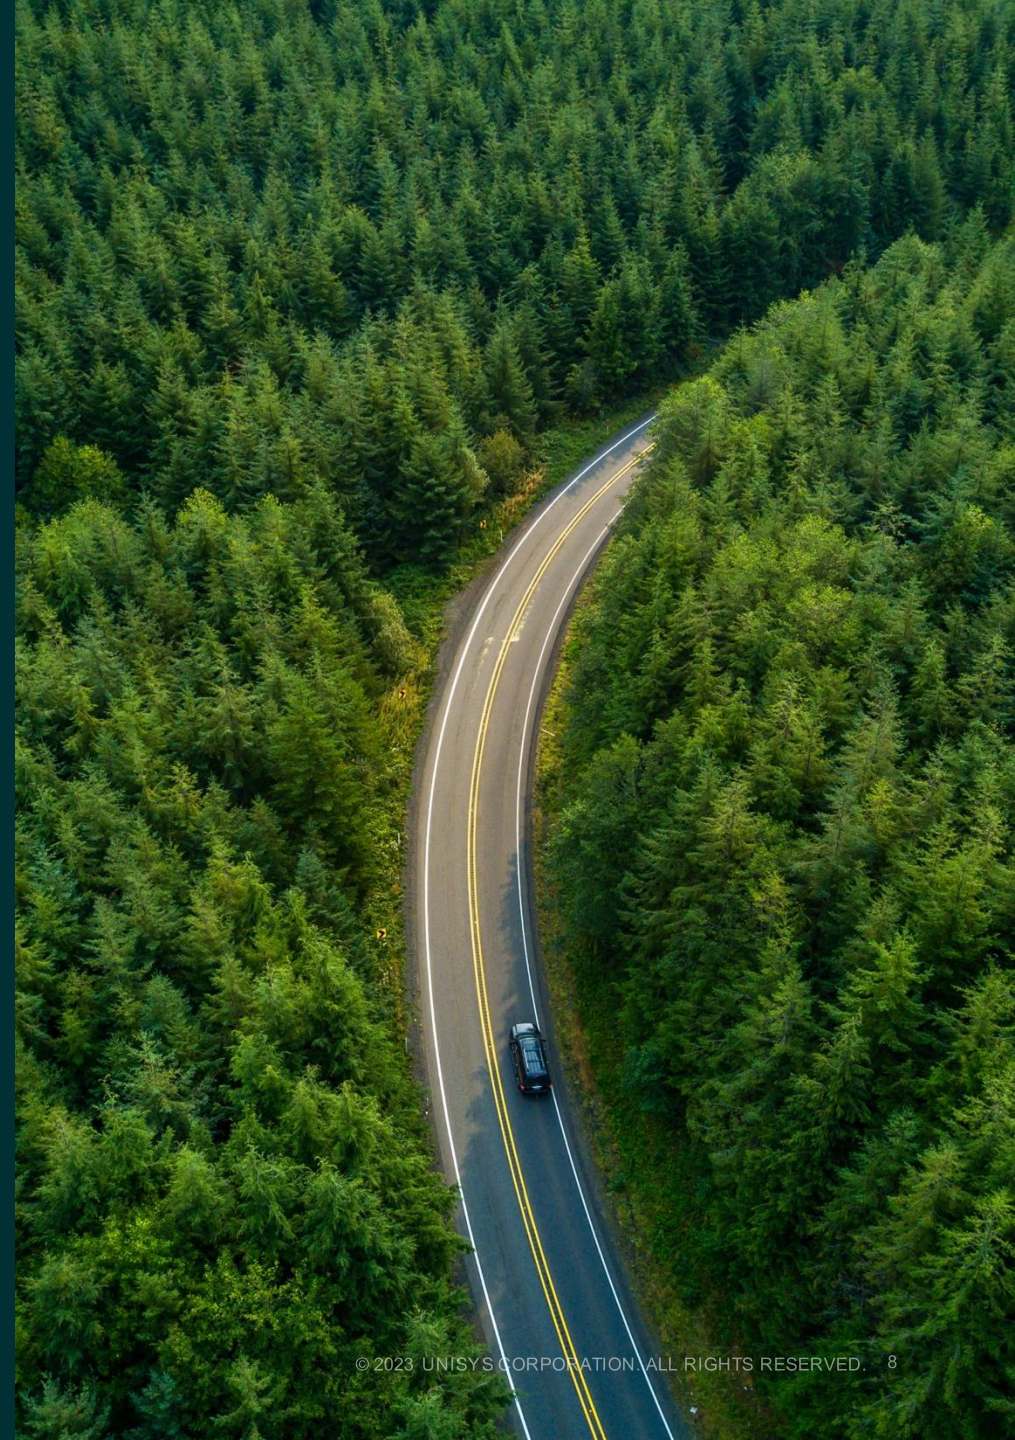

Technical proficiency

Resourcing capacity

Global team

Domain expertise
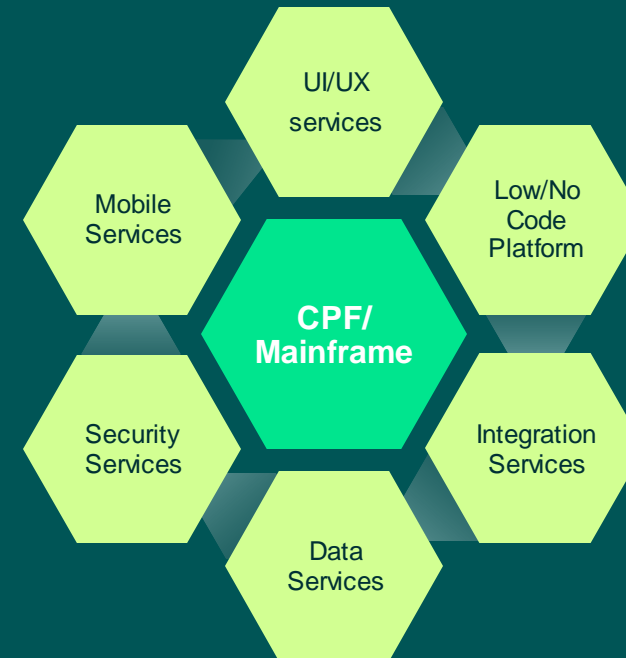

Application Modernisation

Applications modernisation: creating value for new and existing clients

Modernise the **ecosystem** connected with CleaPath Forward (CPF), competitor mainframes, and legacy applications

CPF or the mainframe will remain the **system of record**

CPF / Mainframe with Ecosystem

- UI/UX services
- Low/No Code Platform
- Integration Services
- Data Services
- Security Services
- Mobile Services
- CPF/ Mainframe

Ecosystem encompasses applications, interfaces, and the technologies that connect to offer a seamless user experience

Modernise the ecosystem with Unisys

**Leverage
Long-Term
Investments**

**Enable
Business Agility**

**Reduce
Time to Market**

**Offer
End-to-End
Solutions**

**Attract
Top Talent**

Modernisation offerings and benefits

Our service offering enable allowing our clients to run their business more effectively and efficiently

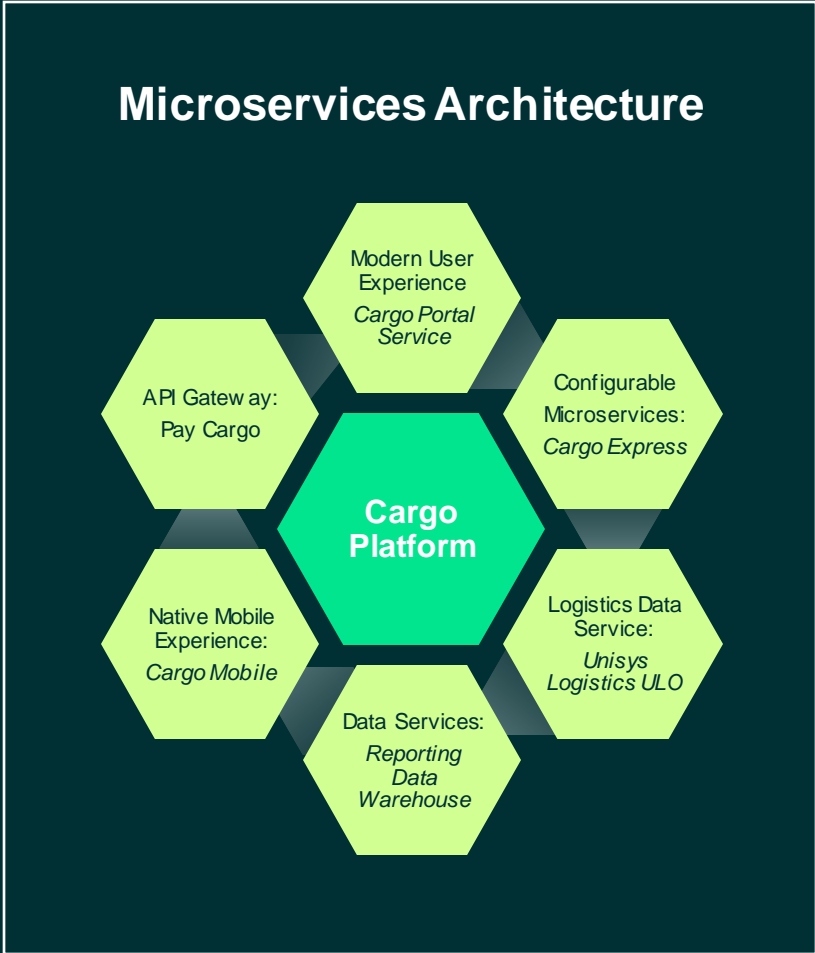

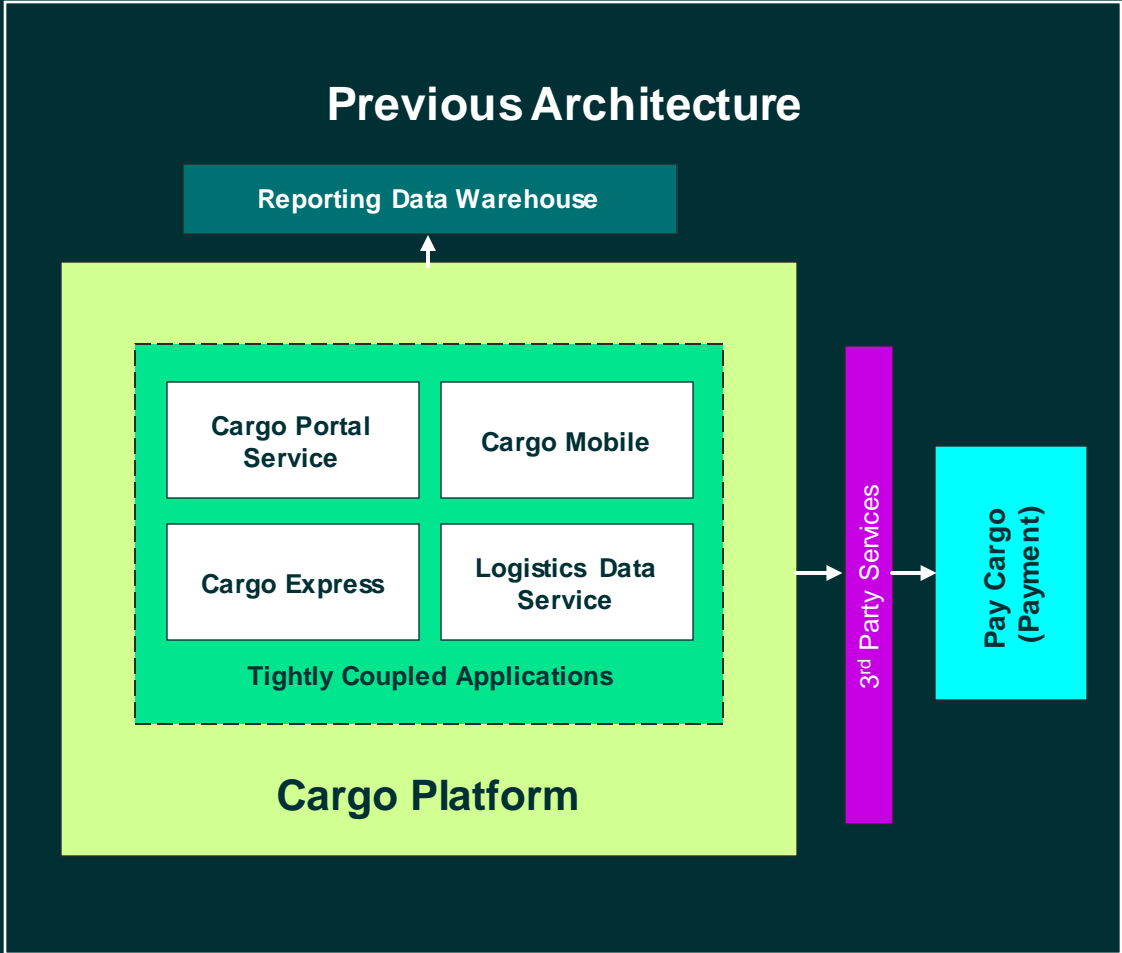

| 12 OFFERINGS	BENEFITS
1. AGILE DELIVERY	• Faster software deliveries • Improved deliveries predictability, with better lead times
2. API SERVICES	• Better integration and information sharing across the enterprise, partners, customers and "things"
3. AUTOMATED TESTING	• Reduced effort on repetitive tasks and increased focus on more valuable testing • Coverage and frequency of testing increases
4. CLOUD	• Improved scalability through containerisation approach • Facilitate an evolutionary and minimised risk of transition to hybrid cloud
5. DEVSECOPS	• Faster implementation of change • Reduction in post-production faults and errors
6. IMPROVE APPLICATION PERFORMANCE	• Improved user productivity • Critical business functions get completed in optimal time
7. MOBILE EXPERIENCE	• Enables operations on-the-go • Supports both Android and iOS platform
8. MODERN DATA PLATFORM	• Better and sophisticated visualisations help in better decision making
9. MODERN TECHNOLOGY STACK	• Uniform technology adoption improves interoperability between various modules
10. MICROSERVICES ARCHITECTURE	• Enables high availability and better scalability • Increased speed of development and deployment
11. REPORTING & DASHBOARDS	• Improved decision-making ability • Visualisation of transactional data
12. UI/UX	• Improved user satisfaction with consistent look and feel • Ease of use
